EXPERIENCE

PYTHON DEVELOPER INTERN INFOSYS SPRINGBOARD

Feb 2026 – Apr 2026

- Engineered a crypto risk analytics platform processing real-time and historical data for 5+ assets via Binance and CoinGecko APIs.
- Built data pipelines using Python, Pandas, and NumPy to compute financial metrics including volatility, Sharpe ratio, beta, and VaR.
- Developed interactive dashboards using Plotly and Streamlit enabling real-time visualization of risk-return insights.
- Designed classification models categorizing assets into risk tiers, improving investment decision analysis.

PYTHON INTERN NATIONAL SKILL DEVELOPMENT CORPORATION

Dec 2025

- Developed 3+ modular Python applications, improving code reusability and debugging efficiency.
- Identified and resolved runtime issues, enhancing application stability and performance.

PYTHON DEVELOPER INTERN MOTIONCUT

Jul 2025 – Oct 2025

- Built automation tools reducing manual file processing effort by 40%.
- Designed scalable scripts handling 1000+ files, reducing processing time by 60%.
- Automated workflows using os, shutil, and datetime, minimizing operational errors by 35%.

PYTHON FULL STACK INTERN SHIASH INFO SOLUTIONS PVT. LTD.

Aug 2024 – Jan 2025

- Created Django-based web applications improving page load performance by 30%.
- Optimized backend APIs and database queries, reducing execution time by 25%.
- Enhanced MySQL query efficiency by 20% through indexing and query tuning.

PROJECTS

- Crypto Volatility and Risk Analyzer** Delivered an end-to-end analytics platform that visualizes cryptocurrency risk trends and enables comparative analysis through interactive dashboards for data-driven investment decisions.
- Python Automation Tools** Architected automation scripts to manage file workflows and system processes, reducing manual effort by 40% and improving efficiency.
- Portfolio Website** Devised and deployed a responsive portfolio using HTML, CSS, and JavaScript to showcase technical projects.

CERTIFICATIONS

- Python, NoSQL, Agile – Infosys
- CS50 Python – Harvard (edX)
- Python with AI – Internshala
- Cybersecurity – GUVI
- HackerRank Algorithmic Challenges
- Accenture Developer Simulation
